

## GE MVS models

Freq range (MHz)	RF power (watts)	Package #	Combination #	Notes
136-153	40	NPH10	NPFH10SS	Best for 2 meter ham use, but hard to find
150-174	40	NPH20	NPFH30SS	Most common, works fine for 2m ham use
403-440	25	NPU10	NPFU10SS	
440-470	25	NPU20	NPFU20SS	
470-512	25	NPU30	NPFU30SS	
806-870	25	NP800	NPF800SS	

### Combination # nomenclature:

example: NPFH10SS

NP - product code

F - front mount

H - high band

# - 1=low split high band (136-153MHz), 3=high split high band (150-174MHz)

0 - control panel (none)

S - channel spacing (standard)

S - RF power (standard)
